

PLANET *Conveyors*

Cooler Conveyors

Coolers are custom built to suit specific applications and process lines.

Each unit has fixed or variable speed fans and air distribution plenum plates.

Filtered ambient or chilled air is passed through the product at various speeds to suit the product size, density and duty.

Access panels, hinged hoods and swing away product guides give full access for cleaning.

A variety of belt types and materials can be used.

Coolers are manufactured from Grade 304 stainless steel as standard.

Also Available from Planet Dryers;

- Conveyor Band Dryers
- Nut/Seed Roasting Lines
- Coolers
- Product Cutters
- Belt Conveyors, Elevators, Vibratory Conveyors

Vibratory - feeder Conveyor

Used for metering, regulating and orientating a range of products. Smooth efficient flow rates allows product to be conveyed smoothly and efficiently. Robust, high reliability, minimal maintenance and easy to clean.

Elevating Conveyor

Fixed or variable speed drive. Flight pitches and heights to suit product and throughputs. Angles of incline to suit customer's specific requirements. Units can be supplied with integral infeed hopper and discharge chute.

Conveyors - Flat Belt

Fixed or variable speed drives, dimensions and configuration to suit application, easy to clean, and standard units are complete with belt de-tensioning and self tracking facilities.

Also Available from Planet Dryers;

- Conveyor Band Dryers
- Nut/Seed Roasting Lines
- Coolers
- Product Cutters
- Belt Conveyors, Elevators, Vibratory Conveyors
